

Data Analyst Job Search Report

Prepared for Neha | Source: Indeed (India) | Generated 16 Aug 2026

Candidate Profile Summary

- **Target roles:** Data Analyst / Data Analytics — internships and entry-level/fresher full-time
- **Experience level:** Final-year B.Tech (AI & ML) student, 0 years professional experience; project + open-source based background
- **Key skills:** Python (OOP), SQL, NumPy, Power BI, MS Excel, Jupyter Notebook, HTML/CSS/JavaScript, Git/GitHub
- **Location preference:** Anywhere in India; open to Remote / Hybrid / Onsite
- **Certifications:** Generative AI (Simplilearn/Google Cloud), ML Concepts (Microsoft), Python (Sololearn), TCS iON Career Edge, HTML (Simplilearn SkillUp)

Top Job Opportunities

Filtered from Indeed (India) search results for Data Analyst / Business Analyst / Data Analyst Intern roles. Excluded: postings requiring 2+ years' experience, unrelated AI-trainer roles, and postings older than ~4 weeks.

Company	Role	Location	Posted	Match	CTC / Stipend	Apply Link
SantoGe Digital	Data Analyst Trainee	Kuzhittura, TN (Onsite)	31 Jul 2026	95%	Rs. 5,00,000/yr	Apply
Trymywebsites	Data Analyst	Coimbatore, TN (Onsite)	23 Jul 2026	92%	Rs. 3.05L-5L/yr	Apply
Midbrains Technologies	Data Analyst Intern	Wakad, Pune (Onsite)	21 Jul 2026	90%	Rs. 5,000-10,000/mo	Apply
Genpact	Data Analyst 5B	Bengaluru (Remote)	29 Jul 2026	80%	Not disclosed	Apply
AppsForBharat (Sri Mandir)	Business Analytics Intern	Bengaluru, HSR (Onsite)	10 Aug 2026	78%	Rs. 25,000-30,000/mo	Apply
Local Employer	Data Analyst	Indore, MP (Onsite)	21 Jul 2026	75%	Rs. 15,000-50,000/mo	Apply
Portcast	Data Analyst Intern	Remote	07 Aug 2026	65%	Not disclosed	Apply

Why Each Role Fits

- **SantoGe Digital:** Explicitly wants freshers/final-year students; asks for the exact skill set held — Excel, SQL, basic Python (Pandas/NumPy), Power BI, Git/GitHub.
- **Trymywebsites:** "Freshers with strong analytical skills encouraged to apply"; required skills (Excel, SQL, Power BI, basic Python) match almost exactly.
- **Midbrains Technologies:** "Final-year students/recent grads welcome"; exact tool match (Excel, SQL, Python, Power BI, Pandas, NumPy); potential PPO (pre-placement offer).
- **Genpact:** Large, reputable employer; bachelor's-level entry point; remote — strong resume brand value, though the listing leans slightly toward data engineering.
- **AppsForBharat:** Well-funded Series C startup; SQL is mandatory (a strength); Power BI/Python listed as "good to have".
- **Local Employer (Indore):** Explicitly welcomes freshers with Excel strength; SQL/Power BI listed as "preferred", not required.
- **Portcast:** Python/SQL focus fits well and it's fully remote with a real path to full-time — but it prefers prior internship experience, which is a stretch.

Most Commonly Required Skills

- **SQL** — appeared in nearly every posting (mandatory in most)

- **MS Excel / Advanced Excel** (Pivot Tables, VLOOKUP, Power Query) — near-universal
- **Power BI / Tableau** — preferred or required in most listings
- **Python (Pandas, NumPy)** — usually "basic knowledge" or "advantage", rarely mandatory
- Dashboarding, reporting, and business-KPI storytelling

Skill Gap Analysis

Well covered: SQL, Power BI, Excel, Python basics, Jupyter/NumPy — directly matches employer asks.

Gaps to close:

- **Advanced Excel specifics** (VLOOKUP/XLOOKUP, Power Query, VBA) — named explicitly in several postings; a quick refresher/certification would help.
- **Tableau** — several listings accept "Power BI or Tableau"; currently only Power BI is listed.
- **Public dataset/dashboard portfolio** — current projects (health assistant, e-commerce clone) aren't data-analytics-specific. A visible Power BI/SQL dashboard on a public dataset, pushed to GitHub/portfolio, would directly close this gap.
- **Internship experience** — some intern roles (e.g. Portcast) implicitly favor candidates with prior internships; GSSoC open-source work helps but isn't domain-specific.

Market Demand Insights

- Fresher-friendly Data Analyst roles are genuinely available in India right now — many postings explicitly say "freshers encouraged".
- Salary bands for entry-level are wide: intern stipends run Rs. 5,000-30,000/month, and fresher full-time CTC clusters around Rs. 3-5 lakh/year, occasionally up to Rs. 6L for Excel-heavy but less analytically rigorous roles.
- SQL + Power BI form the baseline expectation almost everywhere — treat these as non-negotiable, not bonus skills.
- Onsite roles significantly outnumber remote ones at the fresher level; remote fresher/intern roles (Genpact, Portcast) are more competitive.

Recommendations to Improve Interview Chances

- Build **one polished, public Power BI or Tableau dashboard project** (e.g. sales/HR/e-commerce dataset) and link it on the resume/LinkedIn/GitHub — the single highest-leverage gap to close.
- Add a resume line quantifying NumPy/Jupyter data work with a concrete outcome (e.g. "cleaned and analyzed a X,000-row dataset to identify Y").
- Pick up a short Tableau or Advanced Excel (VBA/Power Query) certification — inexpensive and frequently name-checked in postings.
- Target the fresher/trainee-labeled postings first (SantoGe, Trymywebsites, Midbrains) — explicit "freshers welcome" language means far less competition from experienced candidates than generic "Data Analyst" listings.

Overall Fit Assessment

The profile is a strong match for **entry-level/trainee Data Analyst roles and analytics internships** in India, especially postings that explicitly welcome freshers — the stated skill bar (SQL, Power BI, Excel, Python) is met or exceeded at 4 of the 7 listings above. The profile is a weaker fit for postings demanding 2+ years' experience or prior internship history; it's advisable to skip those rather than over-apply. On compensation, expect Rs. 3-5L/year for full-time fresher roles or Rs. 5,000-30,000/month for internships — in line with current market norms for this experience level, not a mismatch.

Note: Postings sourced from Indeed's job search API at time of generation; availability, pay ranges, and links may change. Verify details on the employer's page before applying.
